NOTES ON DATA AND THE NJSDC/BIDC

The NJSDC/BIDC

This report was prepared by the New Jersey State Data Center/Business and Industry Data Center (NJSDC/BIDC). The NJSDC is a cooperative project of the State of New Jersey and the U.S. Bureau of the Census. Serving data users in the public, private, and academic sectors, the NJSDC has three main objectives:

- to expand access to and use of census and other statistics
- to provide technical assistance and analytical support in the use of these statistics
- to provide user training on timely, census-related topics.

The New Jersey BIDC is an expansion of the SDC program designed to meet the growing data needs of the economic development community.

The NJSDC/BIDC consists of a network of over 100 state, county, regional, and local agencies. The lead agency is housed within the Division of Labor Market and Demographic Research, New Jersey Department of Labor. For a complete list of the NJSDC contacts, write to: New Jersey State Data Center, New Jersey Department of Labor, CN 388, Trenton, New Jersey 08625-0388.

A variety of statistical reports from State and Federal agencies may be accessed through the NJSDC/BIDC network. Most statistics are from the U.S. Bureau of the Census' regular and special censuses and surveys. The NJSDC will publish New Jersey data from the 1990 Census of Population and Housing when they are available on a flow basis. Data from the U.S. Bureau of Labor Statistics, Bureau of Economic Analysis and the State and sub-state demographic and economic data prepared/compiled by the New Jersey Department of Labor are also available through the NJSDC/BIDC.

These data are made available in either printed reports, on computer tapes, diskettes, microfiche, and/or through an electronic bulletin board. NJSDC Electronic Bulletin Board (NJSDC EBB) users have access to up-to-date publicly available data for New Jersey in an electronic format. For more information on the NJSDC EBB, contact: New Jersey State Data Center, New Jersey Department of Labor, CN 388, Trenton, NJ 08625-0388.

A quarterly NJSDC/BIDC newsletter (*Garden State Data News*) contains information on data releases (including a brief summary of the data), user services, training workshops, conferences, and other relevant items.

The Report

This report presents New Jersey resident population by county (1880 - 1990) and municipalities (1930 - 1990). Population densities are also presented for the State, counties, and municipalities for the years 1930 - 1990. This report also contains United States resident population by state from 1790 to 1990.

In addition to the printed report, these data are also available through the NJSDC/BIDC EBB for subscribers (see the NJSDC/BIDC description), and on diskette for a fee upon request.

Sources of the Data

Data presented in this report are based on the Decennial Censuses of Population & Housing, 1790 through 1990. As of July 1991, two data sets are available from the 1990 Census. They are the PL94-171 data & STF1A.

The objective of the PL94-171 data is to meet the requirements of Public Law 94-171. This law, enacted in 1975, requires the U.S. Bureau of the Census to provide redistricting data in a geographic format requested by state governments. It specifies that within a year following Census Day (by April 1, 1991), the U.S. Bureau of the Census must send to the governor and the legislature of each state the population data they will need to redraw districts for their state legislatures.

To meet the legal requirement, the U.S. Bureau of the Census established a voluntary program to allow states to receive data for voting districts (e.g., election precincts, city wards) in addition to standard census geographic areas such as counties, cities, census tracts, and blocks.

The 1990 Census PL94-171 files contain a count of all persons and all housing units in specified geographic areas. They also provide a race count (five race categories) and a count of all persons of Hispanic origin and persons 18 years old and over of Hispanic origin. In addition, data are provided for all persons not of Hispanic origin and persons 18 years old and over not of Hispanic origin by race (five race categories).

Summary Tape File 1 (STF 1) contains 100-percent data. Population items include age, race, sex, marital status, Hispanic origin, household type, and household relationship. Population items are cross tabulated by age, race, Hispanic origin, or sex. Housing items include occupancy/vacancy status, tenure, units in structure, contract rent, meals included in rent, value, and number of rooms in housing unit. Housing data are cross tabulated by race or Hispanic origin of householder or by tenure. Selected aggregates and medians also are provided. Data are presented in 37 population tables (matrices) and 63 housing tables (matrices).

The PL94-171 data for all geographic areas and the STF1A data for the State, counties, and municipalities are available for review at the State and Newark Public Libraries. The county affiliates of the NJSDC have all the above-mentioned PL94-171 & STF1A data for all of their respective geographic areas. (For a list of the county affiliates, contact: New Jersey State Data Center, New Jersey Department of Labor, CN 388, Trenton, NJ 08625-0388.)

Definitions

Resident Population - Resident population includes those residing in the United States but excludes other American citizens living overseas.

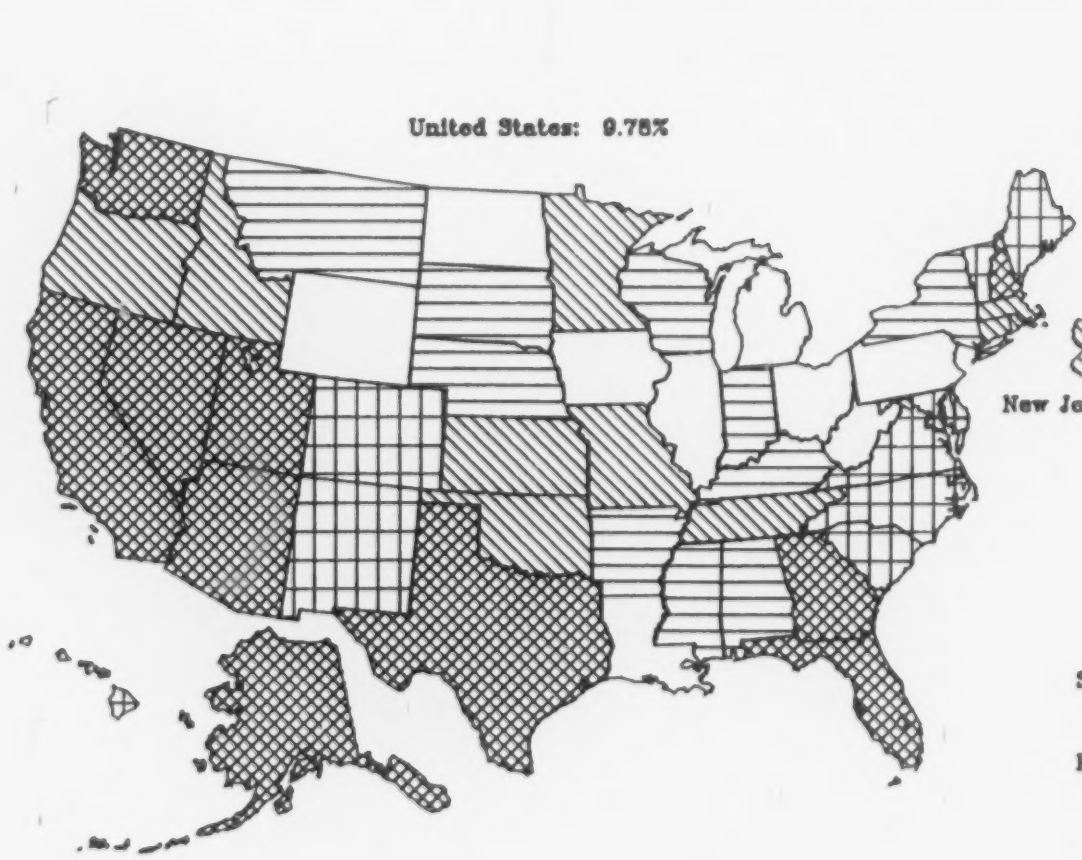
Population Density - A statistic expressing the number of persons per unit of area. In this report, the population density = resident population/the 1990 land area in square miles for each geographic area.

SECTION I

NATION, REGIONS, AND STATES

Population Change by State

United States: 1980 to 1990



Percent Change

- −8 to 0
- .1 to 4
- 4.1 to 8
- 8.1 to 16
- 16.1 and over

1940	2	1	
1950	2	1	
1960	2	1	
1970	1	1	
1980	1	1	
1990	1	1	

* Excludes District of Columbia.

1. Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than 1/8 of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

2. All population densities are based on the 1990 land area measurements from the 1990 Census of Population and Housing.
   Population Density = Resident Population divided by Land Area in Square Miles.

3. United States population density figures given for various census years represent the area within the boundaries of the United States which was under the jurisdiction of the United States on the date in question, including, in some cases, considerable areas not then organized or settled and not covered by the census. In 1870, for example, Alaska was not covered by the the census.
